Projects

- 1) Title** : Shipment Service Website
Platform : Spring Boot,MySQL,React,JSP
Duration : 1 Month
Description : We have made a shipment service website wherein, after logging into our website, users will enter the weight, dimensions, and other details of the item they want to ship. Along with the pickup and drop location, they can also select the date and time of pickup and delivery. After submitting all the details, they will get a quotation for the service. If the user is satisfied with the cost and time taken for the shipment to complete, he/she can continue by confirming the order.
- 2) Title** : To Design and Develop IOT Based Application for Real Time Monitoring of Industrial Manufacturing Activities
Platform : Android Programming,Mechanical Manufacturing
Duration : 6 Months
Description : We have a total of 4 members in our project team. We have developed a Mobile Application and Conveyor System in our project. Mobile applications will extend the flexibility of the monitoring solution, by giving users the flexibility to monitor their machines and shop floor activities 24 hours a day. This allows to extend their productive hours and overall efficiency of Industrial Manufacturing Activity.
